

DIY SECTIONAL SOFA

be sure to watch the video for full instruction. MODERN BUILDS on youtube!

THE SOFA CUSIONS I USED ARE 32"x48" and I added 1.5" on either side for the side cushions.
The seat back is reclined at 15 degrees. This is comfortable but if you like to recline feel free to adjust to 20-25 degrees.

The sides include an extra 3/4" on the back and bottom to accept the back piece and extra blocking on the bottom of the platform.
